

## Fanless slim PC platform with Intel Atom D2700 and ATI graphics card

The Shuttle XS35GTA V3 is an extremely slim and ergonomic Mini PC that works highly energy-efficiently. With a power consumption that is barely worth mentioning, its noise level is close to zero. The XS35GTA V3 has an Intel Atom D2700 dual-core processor (2x 2.16 GHz). The powerful AMD Radeon HD 6430M graphics card makes fluent video playback on full-HD displays a reality. Because of its completely fanless case layout, it is virtually maintenance-free and noiseless. The 38mm thin case of the XS35GTA V3 provides room for one slim-line optical drive and one 2.5in hard disk or SSD. WLAN (n) and a card reader are already built in. It sports an array of connectors too which include HDMI, D-Sub (VGA), 5x USB, VGA, Gigabit-LAN and audio ports.

## Barebone XS35GTA V3 Slim PC

## Shuttle Barebone XS35GTA V3 - Product Features

### Slim and stylish

Designed as a space-saver, this sleek 1.5 litre nettop PC only measures 3.8cm in width. It maximizes space whether it is placed upright using its stylish stand or affixed to the back of a display with the optional VESA mounting kit (PV01). Due to its small size and flexible design, this practical nettop offers exceptional functionality and is well-suited for home users, small offices, reception areas, classrooms, libraries, showrooms, call centres, public institutions and more.

### Fanless and quiet

The Shuttle Barebone XS35GTA V3 comes totally fanless making it perfect to be used in noise-sensitive environments such as living rooms, hospitals, libraries etc. As an additional benefit, fanless cases rarely gather dust on the inside and stay cleaner than others. So it's not only quiet and low in energy use, but also dust-free and virtually maintenance free.

### The Atom processor integrates the memory controller

Shuttle XS35GTAV3 is equipped with Intels Atom processor D2700 (2.16GHz, codenamed Cedarview). It comes with both the memory controller and graphics core on-die which helps to keep heat dissipation and memory latency low. The CPU is connected to the Southbridge NM10, codenamed Tiger Point.

### Dual Core. Do more.

Shuttle always uses the dual-core variant of Intel's Atom processors and thus integrates the Atom D2700. This boosts the system performance significantly with particular regards to multi-threaded applications.

### AMD Radeon HD 6430M graphics

Even with the small size, the Shuttle Barebone XS35GTA V3 is equipped with AMD Radeon HD 6430M graphics for a power-packing slim PC that's unmatched in size and performance – and is made for more than just entertainment. Key benefits are:

- Better Performance for 3D rendering and video playback
- Digital 7.1 channel audio output over HDMI
- Supports DirectX 11 and Shader Model 5.0
- Ready to take on games

### Highly energy-saving

The XS35GTA V3 barely consumes, depending on system load, about 19~27 Watts. Running the device\*) 5 days a week for eight hours a day, the annual consumption would amount to approx. 60kWh which would mean just 12 Euros on the power bill (20 Euro ct/kWh) - way less than a conventional desktop PC draws.

\*) Based on a configuration with 4GB of memory, 500GB hard disk, DVD drive and Windows 7

### What does "Barebone" mean?

Shuttle's barebones line such as the XS35GTA V3 is targeted at experienced users seeking to build a complete system to meet their individual requirements. The bulk of components is yet built in, simply the following hardware is to be installed upon purchase in this case:

- One 6.35 cm/2.5" Serial ATA hard disk or Solid State Disk (SSD)
- One or two DDR3 SO-DIMM memory modules (204 pins), max. 4 GB
- USB keyboard and USB mouse
- Optional: Slim-line optical drive (12.7mm height, DVD/Blu-ray, slimline format)
- Operating system: Windows 7, 32 or 64 bit

### Two monitor support with HDMI (DVI) and D-Sub/VGA

The AMD Radeon HD 6430M graphics card supports multiple display support on up to two separate monitors via HDMI (DVI through optional adapter) and D-Sub/VGA. This improves the capabilities and productivity of the user by allowing them to spread multiple windows over two monitors and view them simultaneously.

### XS35GTA V3 supports Blu-ray

The XS35GTA V3 with AMD Radeon HD 6430M graphics offers a plus in performance - experience videos and Blu-ray \*) movies at full-HD 1080p quality. The Shuttle Barebone XS35GTA V3 even takes on games. Benefit from an increase in performance when playing and converting videos, editing images and working with different applications at once. With AMD Radeon HD 6430M you get the maximum out of Windows 7.

\*) Slim-line Blu-ray drive and appropriate software required

### 4-in-1 card reader

The built-in 4-in-1 card reader at the front side makes it easy to transfer files from your camera so you can share videos and photos on your XS35GTA V3 with ease.

#### Kensington Lock

This is a small, metal-reinforced hole as part of an anti-theft system. As known from notebooks, this Mini-PC can also be safely locked by tying it to a solid object.  
(The lock-and-cable apparatus is not included.)

#### Optional second hard disk (Accessory PHD2)

The optional accessory PHD2 supports a second 2.5" hard disk. Please note, that the bay for the optical drive will be occupied then.

#### Tiny power adapter

The external 40W power adapter is virtually noiseless and can easily be hidden behind the desk thanks to its tiny dimensions.  
Dimensions: 89.5 x 37 x 26.5 mm (LWH) = 88ml

#### Easy installation

Remove just one screw to unmount the two chassis covers.

#### Optional VESA mount (Accessory PV01)

Its optional VESA75/100 wallmount allows it to be installed on to walls or just affixed on the rear side of a monitor which is particularly interesting for the industry segment, company buildings and public institutions.

### 24/7 nonstop operation

Shuttle XS35GTA V3 is officially approved for 24/7 permanent operation. Thanks to its low power consumption and completely passively cooling, this PC runs highly reliable making it perfectly suitable for digital signage and POI/POS applications.

#### Conditions for permanent use:

- Ambient temperature while under load: 5-35°C
- Air humidity while under load: 10-90% (not condensing)
- Free circulation of air amongst the PC must be guaranteed
- Ventilation holes must be clear
- If a hard disk is installed, this must also be approved for permanent operation by its manufacturer (max. one hard disk)

### Note on operating position

Please make sure the system is always placed upright using either its stand or the optional VESA mount. Ventilation holes must not be blocked to ensure sufficient cooling.
